

We are going to participate BAMBOO EXPO 22

Oct. 23th. 2024

We are going to participate at “BAMBOO EXPO 22” exhibition.

The theme of the exhibition is “Natural Stainless Steel Art with Evolutional Sustainability” in collaboration with a string artist, Kumiko Misaki. We will exhibit products that represent natural colors and textures in stainless steel, as well as Misaki designer's string art works, which create new value by reusing the scraps of decorative stainless steels. We hope you will experience the sustainability of stainless steel and its potential fusion with nature.

If you are interested, please make a pre-register through below URL.

We look forward to seeing you in this exposition.
